High Noon 5

High Noon 5

The High Noon 5 impresses with enormous output and its round yet slim design, making it ideal as a sun or moon light. Round reflections in the eyes appear particularly natural on camera. With over 2200 individual LEDs, it provides an even and homogeneous light distribution. With the optional diffusion skirt, the High Noon 5 can also be used as a space light. The attached ILB 500 controller can be easily removed and connected via cable. Without the controller, the High Noon 5 including yoke weighs only 7 kg.

Highlights

- 550 Watt
- Bicolor
- 2700 – 6500 Kelvin
- Ø70 cm
- 360° Swivel yoke
- Ultra-slim design
- Super lightweight
- ILB500 Controller detachable
- Optional Diffusion Skirt „Space Light“
